

Henrik Bindslev

**Vice Dean for research, Faculty of Science and Technology, Aarhus University
Chairman of the European Energy Research Alliance**

Following his PhD in Plasma Physics from University of Oxford, Henrik devoted himself to fusion energy research at the European research centre JET (www.jet.efda.org), and subsequently at the Dutch research centre FOM and later at Risø National laboratory (www.risoe.dk). While at JET, Henrik was also a research fellow at Oxford teaching math.

2007 till 2011, as Director of Risø DTU, the National Laboratory for Sustainable Energy, Henrik engaged the full range of sustainable energy research topics, initiating among others smart grids and batteries research at Risø DTU. 2010 Henrik was elected Chairman of the European energy Research Alliance (www.eera-set.eu), which today conducts 7 Joint Programmes with more than 85 participating research organisations.
